VZOREC / SAMPLE

I. IDENTIFIKACIJA BLAGA / CERTIFICATION FOR:

Št. izdelka / Product No.	Izdelek / Product	Št. odobritve / Approval No.

Številka serije / Batch No.	Vrsta pakiranja / Packing	Neto masa / Nett weight	Bruto masa / Gross weight

Oznake / Marks:

Naslov izvoznika / Address exporter:

Naslov prejemnika / Address consignee:

Tranzitna država / Transit country:

Namembna država / Country of
destination:

Točka vstopa v državo / Point of entry:

Prevozno sredstvo / Means of
conveyance:

Identifikacija prevoznega sredstva /
Identification of the means of
conveyance :

Številka kontejnerja / Container
number:

Številka zalivke / Seal Number:

II. Spodaj podpisani uradni veterinar potrjujem / The undersigned certifies that:

1. Krma in krmni dodatki živalskega izvora, ki so namenjeni za prehrano živali, so proizvedeni v obratih, ki so odobreni s strani pristojne veterinarske službe in so pod rednim nadzorom te službe. / Feed and feed additives of animal origin destined for animal feed were manufactured by establishments, that are approved by the Competent Veterinary Service in the EU on delivery of goods for export and are under constant control from this Service.
2. The random collected sample of the end product complies with the following standards, which is confirmed by the result of regular routine investigations conducted in the official laboratory:
 - Total bacterial contamination does not exceed 500 thousands of microbial cells in 1 g;
 - Salmonella in 25 g: n = 5, c = 0, m = 0, M = 0;
 - Enterobacteriaceae in 1 g: n = 5, c = 2, m = 10, M = 300;
 - Sulphite reducing Clostridia: < 1000 cfu/g;
 - E-coli in 1 g: n = 5, c = 2, m = 100, M = 1000.

Where:

- n = number of units comprising the sample;
- m = threshold value for the number of bacteria; the result is satisfactory if the number of bacteria in all sample units does not exceed m;
- M = maximum value for the number of bacteria; the result is considered to be unsatisfactory if the number of bacteria in one or more sample units is M or more;
- c = number of sample units the bacterial count of which may be between m and M, the sample is still being considered acceptable if the bacterial count of the other sample units is m or less; /

Končni proizvod je bil analiziran z naključnim vzorčenjem in izpolnjuje naslednje zahteve, kar je bilo potrjeno na podlagi rednega rutinskega vzorčenja v pooblaščenem laboratoriju:

- Skupno število mikroorganizmov ne presega 500 tisoč celic v 1 g;
- Salmonella v 25 g: n = 5, c = 0, m = 0, M = 0;
- Enterobacteriaceae in 1 g: n = 5, c = 2, m = 10, M = 300
- Sulfidreducirajoči klostridiji: < 1000 cfu/g
- E.coli v 1 g: n = 5; c = 2, m = 100, M = 1000

Pri čemer je:

- n = število enot v vzorcu
- m = mejna vrednost za število bakterij: rezultat je ustrezen, če število bakterij v vseh vzorcih ne presega vrednosti m
- M = maksimalna vrednost števila bakterij; rezultati so neustrezni, če je število bakterij v enem ali večih vzorcih enako M ali več
- c = število vzorcev, pri katerih je število bakterij lahko med vrednostima m in M, vzorec pa še vedno velja za ustreznega, če je število bakterij v drugih vzorcih m ali manj.

3. Pakiranje je vodotesno, prvič uporabljeno in ustreza predpisanim higienskim zahtevam v skladu z evropsko in nacionalno zakonodajo. / Packing material is waterproof, used for the first time and satisfies the necessary hygienic requirements in accordance with EC and national legislation.
4. Transportna sredstva so bila pripravljena v skladu z veljavno EU zakonodajo. / Means of transport are treated and prepared in accordance with the rules approved in the EU.
